

2018 Volume 2 Issue 2

Guest Editor, Prof. dr Milija Kraišnik, Dean of the University of East Sarajevo, Faculty of Mechanical Engineering

This issue is based on the selected papers from the 4th International Scientific Conference COMETA 2018 "Conference on Mechanical Engineering Technologies and Applications", Jahorina, B&H, RS, 2018

FEM analysis of gerotor machines impeller with planetary motion

Lozica Ivanović, Miloš Matejić

Pages: 1-8

Diagnostics and failure of plain bearings

Ranko Antunović, Goran Šiniković, Nikola Vučetić, Amir Halep

Pages: 9-18

Upgrading a measuring pipe line in heating power plant by CFD technology

Valentino Stojkovski, Zvonimir Kostikj, Filip Stojkovski

Pages: 19-26

Numerical and experimental modal analysis of high speed spindle

Miloš Knežev, Aleksandar Živković, Milan Zeljković, Cvijetin Mladenović

Pages: 27-33

Optimization of Ravigneaux planetary gear set

Slavica Miladinovic, Sandra Veličković, Blaža Stojanović, Stefan Milojević

Pages: 34-41

Armour steel plates of new generation

Jure Bernetić, Borut Kosec, Mirko Gojic, Milan Rimac, Zijah Burzic, Gorazd Kosec, Milan Bizjak, Ales Nagode

Pages: 42-47

Calibration certification of attribute check fixtures for tube manufacturing using structured light 3D scanners

Milan Blagojević, Miroslav Živković, Aleksandar Miljković, Saša Jovanović, Đorđe Marković

Pages: 48-55

Study of the influence of cycle factors on the thermal fatigue behavior of aluminum alloy 2017a

Lamine Rebhi, Branimir Krstic, Boudiaf Achraf, Aderraouf Zemmoura, Dragan Trifkovic

Pages: 56-67
